Monument for a Legend!

- ▶ We would like the City consider creating a monument for the Legend from our lake. The present record for the largest lake trout caught on a hook in Alberta is held by this fish 52 ½ pounds lake trout!
- ▶ We are suggesting that a monument be created and erected on or near the Marina to attract attention and tourism to our area. Which could include a write-up of the history on this fish and the people in the picture.
- ▶ If the City is able to create a monument of the oars holding the life size record holding lake trout, it would create a tourist destination and photo opportunity to be shared with all of their friends and family via social media.

Cold Lake, Alberta

Since 1929, Cold Lake has held the record for the largest Alberta Lake Trout. Legends say the monster fish Kinosoo is still out there, hiding in the deep waters of Cold Lake. Will you be the one to reel it in?
